# Key Features :-

The FL010 support standard Programmable Logic Controller features. The user can implement logic, specific to application using standard Ladder programming. A PLC logic block can be executed at power up, during every scan, upon a timer interrupt.

Supported Tasks include:

- Write value to Tag
- Subtract a constant value from Tag
- Subtract Tag B to Tag A
- Turn Bit Off
- Copy Tag B to Tag A
- Add a constant value to Tag
- Add Tag B to Tag A
- Turn Bit On
- Toggle Bit
- Swap Tag A and Tag B

This PLC possess powerful programmable logic features. User can implement logic, specific to application using standard Ladder programming. Some of the Key features are as mentioned below :

Expansion module (Digital and Analog)

FL010 I/O can be expanded using modular I/O modules. These modular I/O are Digital and Analog type. User can use Digital / Analog or combination of both. Various combination of Digital expansion modules are available. User can have up to 4 universal analog inputs and 2 analog outputs or 8 analog inputs. Analog inputs are mA, mV, 0-10 VDC, RTD and TC. The Analog outputs are 4-20 mA or 0-10 VDC. User can select appropriate I/O module depending on the application.

Communication

The PLC is designed to have up-to 2 serial and 1 USB communication ports. Serial ports can be defined as Modbus RTU (Master or Slave) or can be connected to various third party devices such as PLCs, Drives, PID Controllers, SCADA etc. Most industry standard protocols are supported. The USB port is used for programming and monitoring the PLC.

Digital I/O

FL010 can have up to 8 digital inputs integrated to the unit. 2 high speed counter inputs can be configured as single phase input (50 KHz) and quadrature input (5 KHz). Digital inputs are high impedance 24VDC. FL010 can also have up to 8 digital outputs integrated to the unit. 2 digital outputs can be configured as normal PWM output (5 KHz). Digital outputs are relay type (NO) and transistor (NPN) type.

High Speed Counters

FL010 supports high speed counter inputs up to 50 KHz. The user can define up to 2 single phase counter inputs or 1 quadrature input with 1X, 2X, 4X modes.

PWM Output-

FL010 supports PWM outputs up to 5KHz. The user can define up to 2 PWM outputs.

USB Ports

It has one USB (Device) port. The USB port can be used as a programming port or for logic monitoring.

Ladder Support

FL010 supports ladder functionality, which are listed below :

1. Math  
Instructions such as ADD, Subtract, Multiply and Divide. These instructions could be Single word or Double word, signed or unsigned format.

2. Data compare  
Instructions such as Less than, Greater than, Equal to, Less than or Equal to, Greater than or Equal to etc. are supported.

3. Data Transfer Instructions
